

## **Class Size Guidelines**

For each school the superintendent of schools shall establish an educationally-sound class enrollment, ensuring that such enrollment does not negatively impinge on the financial ability of the school district and/or the available space in any given school.

General guidelines for class size will be:

1. Preschool – 16 students per two staff
2. Kindergarten - 2nd – 20-25 students per teacher
3. Grades 3-12 – 25-30 students per teacher

The superintendent or designee has the responsibility and authority to make assignments of staff to the grade levels where they are deemed most necessary.
